SKILLS

Frontend Development: HTML5, CSS3, JavaScript ES6+, TypeScript

Frontend Frameworks: React, Next

State Management: Redux, Redux Toolkit

Styling: Styled Components, Tailwind

Testing Frameworks: Jest, React Testing Library, Vitest

Version Control Systems: Git, GitHub

UI Component Libraries: Ant Design, Mantine

UI Development Tools: Storybook, Figma

LANGUAGES

English: Upper Intermediate

Ukrainian: Native

Russian: Native

EXPERIENCE

Frontend developer (React)

Bluegrove

February 2020 - June 2023, remote

Implemented new features and functionalities using React, TypeScript, Redux, and Redux Toolkit to improve the overall experience of the product.

Collaborated closely with the design and product teams to ensure the successful translation of UI/UX designs into high-quality, responsive web applications.

Utilized testing frameworks such as Jest and React Testing Library to write comprehensive unit tests and ensure code quality and stability.

Developed reusable UI components and utilized UI component libraries like Ant Design, and Mantine to accelerate development and maintain consistency across the application; the result was the ability to build clean interfaces for new feature requests much faster.

Participated in code reviews, providing constructive feedback to peers and improving overall code quality.

Worked with backend developers to integrate frontend code with RESTful APIs, ensuring smooth data flow and seamless user experiences.

Utilized Git for version control, following branching and merging best practices.

Actively participated in Agile development methodologies, including sprint planning, daily stand-up meetings, and retrospectives.

Stayed up to date with industry trends and advancements in the React ecosystem, incorporating new tools and technologies into projects when appropriate. Increased application performance by an average of 10%, resulting in improved user experience.

QA Engineer and QA Automation Engineer (python)

Bluegrove

August 2018 - February 2020, remote

Implemented test suites for various projects using Selenium, Python, and CI integration, which helped to ensure high-quality and reliable software and reduced the number of bugs in production.

EDUCATION

Master Degree

National Technical University "Kharkiv Polytechnic Institute" • Ukraine, Kharkiv • 2015 • 4.5
